

**Title:** Cabling Labor Hand

**Start Date:** Immediately

**Position Description:**

Entry level position: The successful candidate will demonstrate the ability to follow instruction, have a strong sense of logic and show interest in learning new skills.

The successful candidate does not require any previous training or experience with field end or rack end equipment but should have some basic understanding of structured cabling and experience in placing cabling. Experience dressing and terminating ends and the desire to learn and develop additional skill sets and knowledge base is an advantage. NTSI will provide on the job training and certifications as required.

The day to day responsibility of the Cabling Labor Hand requires him/her to communicate with the office throughout the day and work cooperatively with coworkers and representatives of the customer. (S)he will be expected to pull/place cabling to corporate standards as instructed and document progress. Most sites are plant environment and require working at heights.

Lastly, the Network Technician may be asked to be available for some level of travel and after hours and/or weekend work.

**Knowledge & Fields of Work:**

- Basic cable pulling, dressing of cabling and terminations
- Installation of trays and managers

**Responsibilities:**

- Installation, Termination and Integration of Voice, Data and Fibre Optic Cable
- Installation and Integration of Various Low-Voltage Systems
- Work Independently as well as In a Team Setting
- Interface with Customer Representatives, As Required
